

ENGINEERING CHANGE NOTICE

DART AEROSPACE LTD		ECN #: 814	
Date: 06.06.07			
Project No: D412-742	Created By: CB	Checked By: 	
Project Name: Float Skid tube Installation	Approved By: (Proj. Manager)	Approved By: (Management if reqd)	

Description of Change:

- DSI 9330 RevB adds the note that the Dart D412-742-018 can be used as a replacement for the AAI Skid Guard 412-153-510 that is installed with the AAI Hoist Support Assembly P/N 412-142-300/-350/-400
- added at request of customer
- DSI 9336 Rev A adds note that AN4C7A bolts can be used instead of AN4C6A bolts for holes 7 and 8
- added because original bolts may not be long enough to ensure proper fastening

James (at FAA),

This is perfect, as far as I'm concerned.
It will save everyone a lot of time.
This is the philosophy we will adopt on STC revisions from now on.
As soon as we get an approved 8110-3 from a DER, we will consider the change approved.
We were only sending these in to the FAA for a letter because this was our understanding of the procedure.
Thanks for the clarification.

Serge (at Dart),

Please go ahead and release MDL-D412-742 Rev. F as well as DSI 9330 Rev. B and DSI 9336 Rev. A.
Please print a copy of this email and put it in the project binder for future reference.

David

David:

I noted that the FAA Form 8110-3 is already marked approved by Dave McClenehan. Therefore, further approval by FAA letter is not required.

I know that in the past Candice has acknowledged these drawing packages via FAA letter. But as we're not staffed for this any longer, let's accept that the 8110-3 alone is sufficient. OK?

Regards,

Jim

Fw: More updates to SR01583SE

Jim,

This is from one of Candice's applicants. This needs to be assigned to someone.

Thanks,

Jean A. Newton

FW: More updates to SR01583SE

Jean,

I tried to send this in to Candice, but it got rejected. I phoned her and got a message saying she no longer works at the FAA. Can you help me out with this one, or let me know who to send it to.

Thanks,
David

Subject: FW: More updates to SR01583SE

Candice,

We have had to make a couple more updates to MDL-D412-742 for SR01583SE:

a) DSI 9330 Rev. B has been updated to add the note that the D412-742-018 Cable Guard Kit can be used as a replacement for the AAI Skid Guard 412-153-510 that is installed with AAI Hoist Support Assembly P/N 412-142-300/-350/-400. This note was added at the request of our customers. There has been no change to the design of the D412-742-018 Cable Guard Kit as a result of this document revision.

b) DSI 9336 Rev. A has been updated to add the note that the AN4C7A bolts may be used instead of AN4C6A bolts for two holes on the saddles to ensure proper fastening.

The following data has been submitted in support of these changes:

- a) 8110-3 signed by DER Dave McClenahan
- b) a copy of MDL-D412-742 Rev. F
- c) a copy of DSI 9330 Rev. B
- d) a copy of DSI 9336 Rev. A

We need a letter from the FAA accepting these changes by the end of this week in order to be able to include this paperwork with our upcoming shipments.

Thanks in advance for your support.

Regards,

David Shepherd
